Summary

Frontend-focused full-stack developer experienced in building responsive, user-friendly web and mobile applications with React.js, React Native and TypeScript. Skilled in reusable component architecture, state management, REST API integration, Tailwind CSS, Vite, and Git-based workflows.

Skills

JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • React.js • Next.js • React Native/Expo • Tailwind CSS • Sass/SCSS • Material UI • Redux Toolkit • RTK Query • Zustand • RESTful APIs • GraphQL • WebSockets • Node.js • Express.js • SQL • NoSQL • Jest • React Testing Library • WCAG 2.2 • Git • Docker • AWS • CI/CD • Vite • Webpack • PWA • Service Workers • SSR • SSG • ISR • UI/UX • Figma

Work Experience

Layers AI Inc. Aug 2025 - Aug 2026
Senior Front-End Engineer & UI/UX Designer Calabasas, California • Remote

- Turned an early-stage concept into a production-ready consumer mobile app, defining its core journeys, feature priorities, and UI/UX from the ground up
- Integrated AI-powered capabilities into core user journeys, simplifying complex AI interactions into intuitive consumer-facing experiences
- Launched the app on mobile app stores, owning release preparation, versioning, store submissions, and ongoing production updates

Get2Germany Jan 2025 - May 2025
Senior Front-End Engineer Berlin, Germany • Remote

- Delivered a cleaner, more maintainable codebase by re-architecting a poorly-structured app eliminating duplicated components and separating presentational and container components
- Improved app performance by introducing React Query for data fetching and centralizing state with Zustand (persisted via MMKV), removing redundant network calls and fixing inefficient data flows
- Configured Expo EAS for streamlined build, versioning, and over-the-air deployment

Avazoo Worldwide LTD. Jul 2022 - Dec 2024
Fullstack Developer & UI/UX Designer Belize • Remote

- Led a full rebuild of the company's mobile app, improving load times and user experience and adding key features like a referral system, location targeting, merchant payments and SDK integrations for 12,000 users
- Led modernization of legacy web-app with ReactJS(Inertia) to handle large datasets more efficiently, improving back-office tool performance and reducing data processing time from ~1 minute to under ~5 seconds
- Automated CI/CD pipelines using GitLab CI/CD, integrating Jest for testing to reduce deployment errors and ensure stable, on-time releases

AppTech Gateway Sep 2021 - Jun 2022
Fullstack Developer & UI/UX Designer Belize • Remote

- Built a cross-platform matching game, deployed across all company products (mobile + web app) with complex state management for seamless synchronization. Integrated a centralized API to track and analyze user actions

- Developed a scalable Node.js/Express services handling core game logic, real-time user matching, and analytics - processing concurrent player interactions
- Overhauled legacy web-app's performance and responsiveness with front-end techniques including lazy loading, optimized asset delivery, asynchronous data loading, and throttle/debounce patterns for heavy UI interactions and with Laravel's performance stack (Page Speed, Telescope, Horizon)

Entinux LTD.

Front-End Engineer & UI/UX Designer

Apr 2019 - Aug 2021

Hong Kong • Remote

- Developed multiple high-traffic mobile applications, including a dating platform, a digital rewards system, and a social services app – designed to handle thousands of concurrent daily users across Hong Kong. Optimized real-time data flows and UI performance to support diverse user activities
- Implemented WCAG 2.1 AA accessibility standards across some Hong Kong government digital projects, ensuring compliance with public sector web guidelines while expanding reach to users with disabilities
- Led implementation of design systems and developed reusable UI components for different projects to ensure consistency and scalability

CrateClub

Front-End Engineer & UI/UX Designer

Mar 2018 - Apr 2019

United States • Remote

- Spearheaded frontend development workflows, introducing modern tooling (Sass, ESLint, Sentry) and enforcing coding standards to reduce bugs and accelerate team productivity
- Built accessible, SEO-optimized frontend features from Figma designs, integrating payment solutions (Stripe, PayPal) with full WCAG compliance and performance enhancements
- Led UI/UX design in Figma for cross-platform apps (web + mobile) and marketing assets, streamlining design-to-dev handoff and ensuring brand consistency

NexusBond Asia Inc.

Front-End Developer & UI/UX Designer

Jan 2016 - Feb 2018

Cebu, Philippines | On-site

- Developed and deployed production-ready websites using HTML5, CSS3, Sass, JavaScript, jQuery, and WordPress
- Built custom WordPress themes and plugins from scratch, leveraging Advanced Custom Fields (ACF) for dynamic content
- Mentored junior developers in WordPress theme development, templating, hooks and 3rd party integration

Education

Liceo de Cagayan University | Bachelor of Science in Information Technology
Cagayan de Oro City
