Summary

I specialize in frontend architecture, data-rich dashboards, reusable UI systems, and AI-powered product experiences. My UI/UX background helps me translate complex workflows and technical requirements into intuitive, consistent interfaces across web, iOS, and Android

Skills

JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • React.js • Next.js • React Native/Expo • Tailwind CSS • Sass/SCSS • Material UI • Redux Toolkit • React Query • Zustand • RESTful APIs • GraphQL • WebSockets • Node.js • Express.js • SQL • NoSQL • Jest • React Testing Library • WCAG 2.2 • Git • Docker • AWS • CI/CD • Vite • PWA • UI/UX • Figma

Work Experience

Layers AI Inc. Aug 2025 - Aug 2026
Front-End Engineer & UI/UX Designer Calabasas, California • Remote

- Structured and maintained a monorepo for multiple React Native and Expo applications, centralizing shared UI, payment, analytics, and provider-agnostic feature packages to reduce duplication and accelerate development
- Architected AI-powered experiences using OpenAI Whisper for speech transcription and OpenAI chat models for conversational features then a triage workflow and personalized recommendations system
- Built dedicated Next.js CMS applications to manage almost 10,000 books, user media uploads, and audio content, while owning mobile delivery through EAS, including builds, versioning, App Store and Google Play submissions, and production updates

Get2Germany Jan 2025 - May 2025
Front-End Engineer Berlin, Germany • Remote

- Re-architected a React Native and Expo application by consolidating duplicated components, separating presentation from application logic, and introducing TanStack Query, Zustand, and MMKV to improve maintainability and runtime performance
- Improved UI quality across the application by implementing design tokens, refining interactions and layouts, standardizing loading, empty, error, and success states, and addressing platform-specific behavior across iOS and Android
- Integrated subscription paywalls with access-based experiences and configured Expo Application Services for builds, versioning, over-the-air updates, testing, and production delivery

Avazoo Worldwide LTD. Jul 2022 - Dec 2024
Fullstack Developer & UI/UX Designer Belize • Remote

- Led a full rebuild of the company's mobile app, improving load times and user experience and adding key features like a referral system, location targeting, merchant payments and SDK integrations for 12,000 users
- Led modernization of legacy web-app with ReactJS(Inertia) to handle large datasets more efficiently, improving back-office tool performance and reducing data processing time from ~1 minute to under ~5 seconds
- Automated CI/CD pipelines using GitLab CI/CD, integrating Jest for testing to reduce deployment errors and ensure stable, on-time releases

AppTech Gateway

Fullstack Developer & UI/UX Designer

Sep 2021 - Jun 2022

Belize • Remote

- Built a cross-platform matching game, deployed across all company products (mobile + web app) with complex state management for seamless synchronization. Integrated a centralized API to track and analyze user actions
- Developed a scalable Node.js/Express services handling core game logic, real-time user matching, and analytics - processing concurrent player interactions
- Overhauled legacy web-app's performance and responsiveness with front-end techniques including lazy loading, optimized asset delivery, asynchronous data loading, and throttle/debounce patterns for heavy UI interactions and with Laravel's performance stack (Page Speed, Telescope, Horizon)

Entinux LTD.

Front-End Engineer & UI/UX Designer

Apr 2019 - Aug 2021

Hong Kong • Remote

- Developed multiple high-traffic mobile applications, including a dating platform, a digital rewards system, and a social services app – designed to handle thousands of concurrent daily users across Hong Kong. Optimized real-time data flows and UI performance to support diverse user activities
- Implemented WCAG 2.1 AA accessibility standards across some Hong Kong government digital projects, ensuring compliance with public sector web guidelines while expanding reach to users with disabilities
- Led implementation of design systems and developed reusable UI components for different projects to ensure consistency and scalability

CrateClub

Front-End Engineer & UI/UX Designer

Mar 2018 - Apr 2019

United States • Remote

- Spearheaded frontend development workflows, introducing modern tooling (Sass, ESLint, Sentry) and enforcing coding standards to reduce bugs and accelerate team productivity
- Built accessible, SEO-optimized frontend features from Figma designs, integrating payment solutions (Stripe, PayPal) with full WCAG compliance and performance enhancements
- Led UI/UX design in Figma for cross-platform apps (web + mobile) and marketing assets, streamlining design-to-dev handoff and ensuring brand consistency

NexusBond Asia Inc.

Front-End Developer & UI/UX Designer

Jan 2016 - Feb 2018

Cebu, Philippines | On-site

- Developed and deployed production-ready websites using HTML5, CSS3, Sass, JavaScript, jQuery, and WordPress
- Built custom WordPress themes and plugins from scratch, leveraging Advanced Custom Fields (ACF) for dynamic content
- Mentored junior developers in WordPress theme development, templating, hooks and 3rd party integration

Education

Liceo de Cagayan University | Bachelor of Science in Information Technology
Cagayan de Oro City
