Summary

Frontend-focused full-stack developer experienced in building responsive, user-friendly web and mobile applications with React.js, React Native and TypeScript. Skilled in reusable component architecture, state management, REST API integration, Tailwind CSS, Vite, and Git-based workflows.

Skills

JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • React.js • Next.js • React Native/Expo • Tailwind CSS • Sass/SCSS • Material UI • Redux Toolkit • React Query • Zustand • RESTful APIs • GraphQL • WebSockets • Node.js • Express.js • SQL • NoSQL • Jest • React Testing Library • WCAG 2.2 • Git • Docker • AWS • CI/CD • Vite • PWA • UI/UX • Figma

Work Experience

Layers AI Inc.

Front-End Engineer & UI/UX Designer

Aug 2025 - Aug 2026

Calabasas, California • Remote

- Led the end-to-end development of consumer mobile applications using TypeScript, React Native, and Expo, transforming early-stage concepts into production-ready products through scalable mobile architecture, reusable components and intuitive UI/UX
- Architected AI-powered experiences using OpenAI Whisper for speech transcription and OpenAI chat models for conversational features then a triage workflow and personalized recommendations system
- Built dedicated Next.js CMS applications to manage 20,000+ books, user media uploads, and audio content, while owning mobile delivery through EAS, including builds, versioning, App Store and Google Play submissions, and production updates

Get2Germany

Front-End Engineer

Jan 2025 - May 2025

Berlin, Germany • Remote

- Re-architected a React Native and Expo application by consolidating duplicated components, separating presentation from application logic, and introducing TanStack Query, Zustand, and MMKV to improve maintainability and runtime performance
- Improved UI quality across the application by implementing design tokens, refining interactions and layouts, standardizing loading, empty, error, and success states, and addressing platform-specific behavior across iOS and Android
- Integrated subscription paywalls with access-based experiences and configured Expo Application Services for builds, versioning, over-the-air updates, testing, and production delivery

Avazoo Worldwide LTD.

Fullstack Developer & UI/UX Designer

Jul 2022 - Dec 2024

Belize • Remote

- Led a full rebuild of the company's mobile app, improving load times and user experience and adding key features like a referral system, location targeting, merchant payments and SDK integrations for 12,000 users
- Led modernization of legacy web-app with ReactJS(Inertia) to handle large datasets more efficiently, improving back-office tool performance and reducing data processing time from ~1 minute to under ~5 seconds
- Automated CI/CD pipelines using GitLab CI/CD, integrating Jest for testing to reduce deployment errors and ensure stable, on-time releases

AppTech Gateway

Fullstack Developer & UI/UX Designer

Sep 2021 - Jun 2022

Belize • Remote

- Built a cross-platform matching game, deployed across all company products (mobile + web app) with complex state management for seamless synchronization. Integrated a centralized API to track and analyze user actions
- Developed a scalable Node.js/Express services handling core game logic, real-time user matching, and analytics - processing concurrent player interactions
- Overhauled legacy web-app's performance and responsiveness with front-end techniques including lazy loading, optimized asset delivery, asynchronous data loading, and throttle/debounce patterns for heavy UI interactions and with Laravel's performance stack (Page Speed, Telescope, Horizon)

Entinux LTD.

Front-End Engineer & UI/UX Designer

Apr 2019 - Aug 2021

Hong Kong • Remote

- Developed multiple high-traffic mobile applications, including a dating platform, a digital rewards system, and a social services app – designed to handle thousands of concurrent daily users across Hong Kong. Optimized real-time data flows and UI performance to support diverse user activities
- Implemented WCAG 2.1 AA accessibility standards across some Hong Kong government digital projects, ensuring compliance with public sector web guidelines while expanding reach to users with disabilities
- Led implementation of design systems and developed reusable UI components for different projects to ensure consistency and scalability

CrateClub

Front-End Engineer & UI/UX Designer

Mar 2018 - Apr 2019

United States • Remote

- Spearheaded frontend development workflows, introducing modern tooling (Sass, ESLint, Sentry) and enforcing coding standards to reduce bugs and accelerate team productivity
- Built accessible, SEO-optimized frontend features from Figma designs, integrating payment solutions (Stripe, PayPal) with full WCAG compliance and performance enhancements
- Led UI/UX design in Figma for cross-platform apps (web + mobile) and marketing assets, streamlining design-to-dev handoff and ensuring brand consistency

NexusBond Asia Inc.

Front-End Developer & UI/UX Designer

Jan 2016 - Feb 2018

Cebu, Philippines | On-site

- Developed and deployed production-ready websites using HTML5, CSS3, Sass, JavaScript, jQuery, and WordPress
- Built custom WordPress themes and plugins from scratch, leveraging Advanced Custom Fields (ACF) for dynamic content
- Mentored junior developers in WordPress theme development, templating, hooks and 3rd party integration

Education

Liceo de Cagayan University | Bachelor of Science in Information Technology
Cagayan de Oro City
