

Roy Jose Buhay

roydesign@outlook.com | <https://roy-buhay.github.io> | +639563776718 | Cebu City, Philippines

SKILLS

- Frontend: JavaScript (ES6+), TypeScript, HTML5, CSS3, React.js, NextJS, React Native, Expo, Zustand, TailwindCSS
- Backend: Node.js, Express.js, RESTful APIs, GraphQL
- Databases: Supabase, SQL (PostgreSQL/MySQL), NoSQL (MongoDB/Firestore)
- Other tools: AWS, Docker, Git, Jest, React Testing Library, Maestro, Figma

WORK EXPERIENCE

Layers AI Inc. | Lead Mobile Developer & Designer

Calabasas, California | Remote

React Native(Expo), Supabase, NextJS, Zustand, React Query, React Testing Library, RESTful API, Figma

Aug 2025 - Aug 2026

- Turned an early-stage concept into a production-ready consumer mobile app, defining its core journeys, feature priorities, and UI/UX from the ground up
- Integrated AI-powered capabilities into core user journeys, simplifying complex AI interactions into intuitive consumer-facing experiences
- Launched the app on mobile app stores, owning release preparation, versioning, store submissions, and ongoing production updates

Get2Germany | Lead Mobile Developer

Berlin, Germany | Remote

React Native(Expo), Zustand, React Query, React Testing Library, RESTful API, Figma

Jan 2025 - May 2025

- Delivered a cleaner, more maintainable codebase by re-architecting a poorly-structured app eliminating duplicated components and separating presentational and container components
- Improved app performance by introducing React Query for data fetching and centralizing state with Zustand (persisted via MMKV), removing redundant network calls and fixing inefficient data flows
- Configured Expo EAS for streamlined build, versioning, and over-the-air deployment

Avazoo Worldwide LTD. | Lead Full-Stack Developer & UI/UX Designer

Belize | Remote

ReactJS, React Native(Expo), Node.js(Express), Zustand, RESTful API, AWS, NextJS, TailwindCSS, Figma

Jun 2022 - Dec 2024

- Led a complete UI/UX overhaul and rebuild of the company's mobile app, improving load times and user experience and adding key features like a referral system, location targeting, merchant payments and SDK integrations – making the app faster and useful for 12,000 users
- Led modernization of legacy web-app's UI/UX and integrated InertiaJS to handle large datasets more efficiently, improving back-office experience and performance – reducing data processing time from ~1 minute to under ~5 seconds
- Automated CI/CD pipelines using GitLab CI/CD, integrating Jest for testing to reduce deployment errors and ensure stable, on-time releases

AppTech Gateway | Full-Stack Developer & UI/UX Designer

Belize | Remote

ReactJS, Redux, Node.js(Express), RESTful API, AWS, NextJS, TailwindCSS, Figma

Sep 2021 - Jun 2022

- Built and designed a cross-platform matching game, deployed across all company products (mobile + web app) with complex state management for seamless synchronization. Integrated a centralized API to track and analyze user actions
- Developed a scalable Node.js/Express services handling core game logic, real-time user matching, and analytics - processing concurrent player interactions
- Overhauled legacy web-app's performance and responsiveness with front-end techniques—including lazy loading, optimized asset delivery, asynchronous data loading, and throttle/debounce patterns for heavy UI interactions— and with Laravel's performance stack (Page Speed, Telescope, Horizon)

Entinux LTD. | Front-end Developer & UI/UX Designer

Hong Kong | Remote

Angular, Ionic, React, Codelgniter, Javascript, CSS3(SASS), Figma

Apr 2019 - Aug 2021

- Developed multiple high-traffic mobile applications, including a dating platform, a digital rewards system, and a social services app - designed to handle thousands of concurrent daily users across Hong Kong. Optimized real-time data flows and UI performance to support diverse user activities
- Implemented WCAG 2.1 AA accessibility standards across some Hong Kong government digital projects, ensuring compliance with public sector web guidelines while expanding reach to users with disabilities
- Led implementation of design systems and developed reusable UI components for different projects to ensure consistency and scalability

Crate Club | Front-end Developer & UI/UX Designer

United States | Remote

Javascript(Typescript), HTML5, CSS3(SASS), Laravel, MySQL, Figma

Mar 2018 - Apr 2019

- Spearheaded frontend development workflows, introducing modern tooling (Sass, ESLint, Sentry) and enforcing coding standards to reduce bugs and accelerate team productivity

- Built accessible, SEO-optimized frontend features from Figma designs, integrating payment solutions (Stripe, PayPal) with full WCAG compliance and performance enhancements
- Led end-to-end UI/UX design in Figma for cross-platform apps (web + mobile) and marketing assets, streamlining design-to-dev handoff and ensuring brand consistency

NexusBond Asia Inc. | Lead Senior Developer / Designer
Javascript, HTML5, CSS3(SASS), Bootstrap, Wordpress, Sketch, Photoshop

Philippines | On-site
Jan 2016 - Feb 2018

- Developed and deployed production-ready websites using HTML5, CSS3, Sass, JavaScript, jQuery, and WordPress, ensuring optimal performance, accessibility, and SEO best practices
- Built custom WordPress themes and plugins from scratch, following PHP coding standards and leveraging Advanced Custom Fields (ACF) for dynamic content management
- Mentored junior developers in WordPress theme development, template hierarchy, hooks and other 3rd party integration

EDUCATION

Liceo de Cagayan University | Bachelor of Science in I.T
Cagayan de Oro City
