

Roy Jose Buhay

Software Developer / Design Engineer

<https://roy-buhay.github.io/>

roydesign@outlook.com • [+639563776718](tel:+639563776718) • Cebu City, Philippines

Skills

JavaScript (ES6+), TypeScript, HTML5, CSS3, TailwindCSS, ReactJS, React Native/Expo, NextJS, NodeJS, ExpressJS, RESTful APIs, SQL, NoSQL, AWS, Docker, Git, UI/UX, Figma

Work Experience

Sr. FullStack Developer & Designer

Layers AI Inc.

August 2025– August 2026
Calabasas, California • Remote

- Turned an early-stage concept into a production-ready consumer mobile app, defining its core journeys, feature priorities, and UI/UX from the ground up
- Integrated AI-powered capabilities into core user journeys, simplifying complex AI interactions into intuitive consumer-facing experiences
- Launched the app on mobile app stores, owning release preparation, versioning, store submissions, and ongoing production updates

Sr. Front-end Developer

Get2Germany

Jan 2025– May 2025
Berlin, Germany • Remote

- Delivered a cleaner, more maintainable codebase by re-architecting a poorly-structured app eliminating duplicated components and separating presentational and container components
- Improved app performance by introducing React Query for data fetching and centralizing state with Zustand (persisted via MMKV), removing redundant network calls and fixing inefficient data flows
- Configured Expo EAS for streamlined build, versioning, and over-the-air deployment

FullStack Developer

Avazoo Worldwide LTD.

Jul 2022 – Dec 2024
Belize • Remote

- Led a full rebuild of the company's mobile app, improving load times and user experience and adding key features like a referral system, location targeting, merchant payments and SDK integrations for 12,000 users
- Led modernization of legacy web-app with ReactJS(Inertia) to handle large datasets more efficiently, improving back-office tool performance and reducing data processing time from ~1 minute to under ~5 seconds
- Automated CI/CD pipelines using GitLab CI/CD, integrating Jest for testing to reduce deployment errors and ensure stable, on-time releases

FullStack Developer

AppTech Gateway

Sep 2021 – Jun 2022
Belize • Remote

- Built a cross-platform matching game, deployed across all company products (mobile + web app) with complex state management for seamless synchronization. Integrated a centralized API to track and analyze user actions
- Developed a scalable Node.js/Express services handling core game logic, real-time user matching, and analytics – processing concurrent player interactions

- Overhauled legacy web-app’s performance and responsiveness with front-end techniques—including lazy loading, optimized asset delivery, asynchronous data loading, and throttle/debounce patterns for heavy UI interactions— and with Laravel’s performance stack (Page Speed, Telescope, Horizon)

Front-end Developer & Designer

Entinux LTD.

Apr 2019 – Aug 2021

Hong Kong • Remote

- Developed multiple high-traffic mobile applications, including a dating platform, a digital rewards system, and a social services app – designed to handle thousands of concurrent daily users across Hong Kong. Optimized real-time data flows and UI performance to support diverse user activities
- Implemented WCAG 2.1 AA accessibility standards across some Hong Kong government digital projects, ensuring compliance with public sector web guidelines while expanding reach to users with disabilities
- Led implementation of design systems and developed reusable UI components for different projects to ensure consistency and scalability

Front-end Developer & Designer

CrateClub

Mar 2018 – Apr 2019

United States • Remote

- Spearheaded frontend development workflows, introducing modern tooling (Sass, ESLint, Sentry) and enforcing coding standards to reduce bugs and accelerate team productivity
- Built accessible, SEO-optimized frontend features from Figma designs, integrating payment solutions (Stripe, PayPal) with full WCAG compliance and performance enhancements
- Led UI/UX design in Figma for cross-platform apps (web + mobile) and marketing assets, streamlining design-to-dev handoff and ensuring brand consistency

Front-end Developer & Designer

NexusBond Asia Inc.

Jan 2016 – Feb 2018

Cebu, Philippines | On-site

- Developed and deployed production-ready websites using HTML5, CSS3, Sass, JavaScript, jQuery, and WordPress
- Built custom WordPress themes and plugins from scratch, leveraging Advanced Custom Fields (ACF) for dynamic content
- Mentored junior developers in WordPress theme development, templating, hooks and 3rd party integration

Education

Liceo de Cagayan University | Bachelor of Science in Information Technology
Cagayan de Oro City
